HELVETICA PHYSICA ACTA

VOLUMEN 68, 1995

CONTENTS – INHALTSVERZEICHNIS – TABLE DES MATIÈRES

Fascicle 1
15. 3. 1995

Jacquod, P.: Effect of the Anisotropy on the Critical Behaviour of the High Temperature Superconductors 1
Debergh, N., Nikitin, A.G.: Parasupersymmetric Quantum Mechanics with an Arbitrary number of Parasupercharges and Orthogonal Lie Algebras 19
Dorlas, T.C.: The Connection Between the Algebraic and the Original Bethe Ansatz for the Six-Vertex Model 32
Frochaux, E.: A Relativistic Quantum Equation for $N \geq 2$ Bosons in Two Space-Time Dimensions 47
Varga, I.: On the Localization Index of One-Electron Eigenstates 64
Oliveira, M.W.de, Schweda, M., Zerrouki, H.: Superdiffeomorphisms of the Three-dimensional BF System and Finiteness 73
Giulini, D.: On the Configuration Space Topology in General Relativity 86

Fascicle 2
14. 7. 1995

Häner, P.: Self-Organized Criticality and Percolation 113
Fassari, S.: An Estimate Regarding One-Dimensional Point Interactions 121
Brandhuber, A., Emery, S., Landsteiner, K., Schweda, M.: The Three-Dimensional BF Model with Cosmological Term in the Axial Gauge 126
Dong Yu-bing: N and Δ Spectra and the Effect of Negative Energy Component of Bethe-Salpeter Amplitude 139
Faure, Cl.-A., Moore, D.J., Piron, C.: Deterministic Evolutions and Schrödinger Flows 150
Chetouani, L., Guechi, L., Lecheheb, A., Hammann, T.F.: Algebraic Solution for Certain Noncentral Potentials 158
Emery, S., Moritsch, O., Schweda, M., Sommer, T., Zerrouki, H.: Local Gravitational Supersymmetry of Chern-Simons Theory in the Vielbein Formalism 167
Mohamed, A., Parisse, B., Outassourt, A.: Erratum à: Asymptotique de la largeur de la Première Bande de l'Opérateur de Dirac avec Potentiel Périodique HPA Vol. 66 (1993), pp. 192/215 187

Frochaux, E.: A new view on the particle description in Quantum Field Theory . . 191
Bochicchio, V., Loeffel, J.J.: Inverse orbits for spin systems 193
Martin, O.J.F., Girard, C., Dereux, A.: Light Confinement by Subwavelength Objects in Near-Field Optics 195
Santi, G., Jarlborg, T., Peter, M.: Existence of *d*-wave and *s*-wave solutions of Eliashberg equations 197
Bonner, T., Baratoff, A., Güntherodt, H.-J.: MD-Simulations of Scanning Force Microscopy on Self-Assembled Monolayers 199
Oberli, D., Gröbli, J.C., Meier, F.: Spin filter effect in Co/Cu(100): Thickness dependent photoelectron spin polarization 201
Egli, W., Kogelschatz, U.: Space charge formation around a high voltage corona electrode in electrostatic precipitators 203
Landau, I.L., Rinderer, L.: Influence of visible light on flux creep in HTS films . . 205
Degiacomi, C.G., Stutzki, J.: The KOSMA 3-M submillimeter wave telescope on Gornergrat 207
Ohle, F.: The influence of boundary conditions to bluff body wakes in fully developed pipe flow 209
Ohle, F., Lange, M.: Low-dimensional modeling of the separation of bluff body wakes 211
Ohle, F., Steinhoff, C.: Three-dimensional phenomena in bluff body wakes 213
Ohle, F., Völkering, L., Schewe, G.: A dynamical system approach to flutter instabilities 215
Heck, C.W., Ohle, F.: Deterministic noise amplification 217
Egolf, P.W., Weiss, D.A.: Elementary geometric figures in fully developed turbulent plane Poiseuille flow 219
Aellig, M.R., Wurz, P., Bochsler, P.: Oberflächenionisation in Raumfahrtsexperimenten 221
Abela, R., Bodek, K., Böni, P., Foroughi, F., Grenacs, L., Jarczyk, L., Kistryn, S., Lang, J., Müller, R., Navert, S., Naviliat-Cuncic, O., Proykova, A., Smyrsky, J., Sromicki, J., Stephan, E., Strazałkowski, A., Zejma, J., Zipper, W.,: Optimization Study for a Measurement of Polarization Observables in μ^--Capture on Nuclei . 223

Fascicle 3
16. 8. 1995

Isar, A.: Density Operator and Entropy of the Damped Quantum Harmonic Oscillator 225
Choquard, P., Bonjour, F., Blanc, J.-C.: Sur la Dynamique du Fléau 235
Maggiore, N., Piguet, O., Ribordy, M.: Algebraic Renormalization of N = 2 Supersymmetric Yang-Mills Chern-Simons Theory in the Wess-Zumino Gauge 264
Cova, R.J.: Skyrmion scattering in (2+1) dimensions 282
Emery, S, Jirari, H., Piguet, O.: Five-Dimensional BF Theory and Four-Dimensional Current Algebra 297
Benfatto, G., Gallavotti, G., Lebowitz, J.L.: Disorder in the 1D Spinless Holstein Model 312

Fascicle 4
15. 11. 1995

Dorlas, T.C., Macris, N., Pulé, J.V.: Localisation of a Single-Band Approximation to Random Schroedinger Operators in a Magnetic Field 329
Feng, J., Tirozzi, B.: The SLLN for the Free-Energy of a Class of Neural Networks . 365
Grib, A.A., Poberii, E.A.: On the difference Between Conformal and Minimal Couplings in General Relativity 380
Coecke, B.: Representation of a Spin-1 Entity as a Joint System of Two Spin-$\frac{1}{2}$ Entities on Which we Introduce Correlations of the Second Kind 396

Fascicle 5
18. 12. 1995

Dvurečenskij, A., Pulmannová, S., Svozil, K.: Partition Logics, Orthoalgebras and Automata 407
Epsztein Grynberg, S., Oliveira, F.A., Blin, A.H., Hiller, B., Nemes, M.C.: On the Anatomy of Hybrid Stars in the Bag Model 429
Giulini, D.: Quantum Mechanics on Spaces With Finite Fundamental Group 438
Shcherbina, M., Tirozzi, B.: A Perturbative Expansion for the Hopfield Model . . 470
Beeli, C., Stadelmann, P., Doudin, B.: Magnetic Flux Measurement of Cobalt Nanowires by Electron Holography 494
Noy, D., Ramseyer, J.-P., Sum, R., Lang, H.P., Güntherodt, H.-J.: Magnetoresistivity in Y-La-Ca-Mn-O thin films 496
Parravicini, G.B., Marabelli, F.: Dielectric Investigation on CuO Single Crystals Phases Transitions 498
Hubler, U., Jess, P., Behler, S., Lang, H.P., Güntherodt, H.-J.: Spatially-Resolved Tunneling Spectroscopy on $Bi_2Sr_2CaCu_2O_8$ Single Crystals 500
Pliska, T., Fluck, D., Günter, P.: Blue-green Laser by Frequency Doubling a Master Oscillator Power Amplifier Diode Laser in a $KNbO_3$ Crystal 502
Marty, T., Suter, D.: Application of absorption measurements to the temperature determination of a cloud of cold Cesium atoms 504
Kowalski, T., Ohle, F.: Some aspects on the logarithmic law of the wall 506
Ohle, F., Heck, C.W.: Estimation of the Landau coefficients for the dynamics of the periodic cylinder wake 508
Völkering, L., Ohle, F.: Low-dimensional modeling of flutter instabilities 510

Fascicle 6
18. 3. 1996

Duan, Y.-S., Lee, X.-G.: The General Decomposition Theory of Spin Connections, Topological Structure of the Gauss-Bonnet-Chern Density and the Morse Theory . 513
Klopp, F., Zworski, M.: Generic Simplicity of Resonances 531
Dalarsson, N.: Constant-Cutoff Approach to the Isovector Exchange Magnetic Moment 539
Perelomov, A.M.: On the Completeness of Some Subsystems of q-Deformed Coherent states 554
Moritsch, O., Schweda, M., Sommer, T.: The Yang-Mills Gauge Field Theory in the Context of a Generalized BRST-Formalism Including Translations 577

Fascicle 7/8
15. 5. 1996

Lőrinczi, J.: Quasilocality of Projected Gibbs Measures through Analyticity Techniques 605
Guidotti, P. Hieber, M.: An Integral Equation Arising in the Study of Above Threshold Photodetachment 627
Fannes, M., Werner, R.F.: Boundary Conditions for Quantum Lattice Systems . . . 635
Moore, D.J.: Categories of Representations of Physical Systems 658
Bacciagaluppi, G., Donald, M.J., Vermaas, P.E.: Continuity and Discontinuity of Definite Properties in the Modal Interpretation 679
